

Purpose of WRD

To provide, protect and preserve high-quality groundwater through innovative, cost-effective and environmentally sensitive basin

management practices for the benefit of residents and businesses of the Central and West Coast Basins

- ❖ Recharge the ground waters in the Basin
- ❖ Repel the intrusion of salt water therein
- ❖ Reduce the pumping therein by all possible means, including necessary legal proceeding to adjudicate the rights of the users

Purpose of ODWD

To serve and satisfy our customers by constantly placing a special emphasis on delivering high-quality water while improving the cost-effectiveness and quality of our services

- ❖ Reliable water supply from pumping WRD groundwater
- ❖ Reduced customer cost with pumping groundwater from WRD
- ❖ Restricts the use of expensive imported water from Northern California, and the Colorado River Aqueduct
